Alakar Harijan - Senior Finance Analyst

E-mail: alakar_harijan@outlook.com | Phone: 9136005288

Professional Summary

With a keen interest in data analytics, an individual from a management background ventured into the field of data analysis. The journey was indeed challenging, but as a wise person once said, "When the why is clear, the how is easy."

Through self-learning, excellent mentorship, and the help of some intelligent individuals, I was able to acquire analytical skills and master various analytical tools. Starting with MS Excel and progressing to Python, my skillset expanded significantly over the years. Each step of the journey brought new insights and experiences that were both rewarding and enlightening.

The support from mentors and peers was invaluable in overcoming the hurdles faced along the way. Looking back, the past seven years have been a fantastic journey of growth and learning. I am grateful for the opportunities and the knowledge gained, which have paved the way for a successful career in data analytics.

Employment History

ISS Shipping India Pvt Ltd, Airoli.
Data Analyst - Market Intelligence- Aug 2022 till present Date

I am involved in a variety of tasks that significantly enhance our operations. Primarily, I track KPIs to improve the performance of our local offices. Additionally, I automate vessel lineup reports and publish them on the Power BI dashboard, ensuring timely and accurate information is available. I also develop and manage several key dashboards, including those for the Panama Canal, Bill Desk, and freight tax.

My role involves continuous monitoring and optimization to maintain high standards of data presentation and usability. By leveraging automation and data visualization tools, I contribute to more efficient workflows and better decision-making processes. This multifaceted approach allows me to support various aspects of our operations effectively and drive performance improvements across the board.

S5 Agency World India Pvt Ltd, Vsahi.
Senior Data Analyst, Anti-Bribery & Compliance - June/2020 to Aug/2022

Recognizing my analytical skills and Excel knowledge, management transferred me to the Data Analytics team, marking the start of my journey as a data analyst. I specialize in developing visual reports, dashboards, and KPIs using Power BI Desktop. I also automate Excel-based reports with Power Query and Macros to reduce manual effort.

My expertise includes creating reports and visualizations in Power BI using DAX, building data relationships, and constructing calculated columns and measures. Additionally, I implement interactive elements like buttons, bookmarks, page navigations, and filters to enhance user exp

Quality Checking and Process Improvement – Aug - 2018 to June 2020

I led improvement projects using Six Sigma, Lean Management, and TQM methodologies, enhancing quality parameters. I conducted root-cause analyses, developed process improvement plans, and made verified recommendations.

I prepared detailed employee performance reports, identified weak areas, and provided solutions. Additionally, I improved the Global Hub's finance processes with automation using Excel, reducing operating costs.

FDA Processing – May - 2016 to Aug - 2018

Responsible for processing FDA documents, handling client inquiries, resolving queries efficiently, and primarily validating FDA submissions. In addition, I ensured all documentation met stringent regulatory standards. My role also involved collaborating with cross-functional teams to streamline workflows and enhance overall process efficiency.

Marcura India (DA Desk), Mahape, Navi Mumbai
PDA Processer Executive - Mar 2015- May 2016

Reviewing the disbursements and contracts associated with each maritime venture of the principals. Any discrepancies will be addressed with port agents and rectified with the approval of the principals.

Inchcape Shipping Services, Belapur, Navi Mumbai.
Operations Executive - June 2010 – Feb 2015

I was very excited about my first responsibility, which was to manage and update the Global Directory. This task involved performing about 70% of the work using Excel while simultaneously handling various operational tasks within vessel operations.
